Recoveries based on 83% thermal efficiency. ASHRAE 90.1 compliant for efficiency and standby loss.

Dimension is for the burner housing only. Gas train may exceed this dimension.

Standard gear capacities may change depending on burner supplier. Designer must use gear capacities from the above chart to size the oil distribution piping system; including transfer pumps (if used).

The information presented is for Natural gas 0.6 S.G.—For operation with Propane (LP gas), consult factory.

Dimensions are in inches unless otherwise specified. For standard and optional equipment, see form PV 8183.
