Recoveries based on 83% thermal efficiency. ASHRAE 90.1 compliant for efficiency and standby loss.

Do not use flue outlet size to determine vent system size. For proper sizing, consult venting supplier.

"J" dimension is for the burner housing only.

Standard gear capacities may change depending on burner supplier. Designer must use gear capacities from the above chart to size the oil distribution piping system; including transfer pumps (if used).

Dimensions are in inches unless otherwise specified.

For standard and optional equipment, see form PV 8166.
