① Recoveries based on 83% thermal efficiency. ASHRAE 90.1 compliant for efficiency and standby loss.
② "J" dimension is for the burner housing only. Gas train may exceed this dimension.
③ Models with "TPL" suffix are less than 55 ppm NOx. SCAQMD models 2TPL (200MBH), 3TPL (300MBH) and 4TPL (400MBH).
④ 4" x 37 1/2" Channel skids for inputs ≤ 400 MBtu/h.
④ 4" x 54 1/2" Channel skids for inputs ≥ 600 MBtu/h.

* The information presented is for Natural gas 0.6 S.G.—For operation with propane (LP gas), consult factory.

Dimensions are in inches unless otherwise specified.
For standard and optional equipment, see form PV 8050.

---

**GAS PRESSURE REQUIREMENTS**

See table for minimum pressure by model number. Maximum static inlet pressure:
10.5" W.C. for 199,000 - 399,000 and 14" W.C. for > 399,000.

**VENTING REQUIREMENTS**

-02" to -06" W.C. (negative pressure)
Type B Venting
Entire vent system should never be sized based upon the vent connection diameter exclusively.
For proper sizing, consult the National Fuel Gas Code under "Fan-Assisted."

---

**STANDARD ELECTRICAL REQUIREMENTS**

Control Voltage: 120V, 1Ø, 60 Hz., 2 Amps.
Motor Voltage:
208V, 230V, and 460V motors are available but will require a separate 120V/2 amps control circuit or an optional control circuit transformer.

PVI reserves the right to change the design and specification without notice.
